Comments: (Including: (i) a brief explanation of any of the above figures necessary to enable them to be understood	The \$9.6m decrease in revenue during the first six months of the year is due to a reduction in M.bovis revenue compared to the prior year, when the response was wound down in November 2020. Covid-19 has also had an estimated \$3.9m reduction in revenue this year. The Net profit has reduced by \$4.5m due mainly to the impact of Covid-19 lockdowns on customer volumes and operating restrictions reducing productivity, along with reduced M.bovis services compared to the start of last year.
(ii) in respect of each half-year period, commentary on the outlook for the remainder of the financial year, including whether the SOE considers it will achieve the financial performance targets in its SCI	The full impact of Omicron on the business is, at this stage, unknown. However lower customer volumes and operating restrictions are expected to continue into the second half of the year, which would result in AsureQuality's full year net profit being under the SCI target for the full year.
